SOCIAL AUDIENCE STATS - RAVEN RIDER UK

OUTSIDE OF RAVEN

Outside of my Raven pages and content making I have my own media company, which covers photography and videography as well as website building, marketing and social media management. I feel like this is always worth mentioning when making contact as it shows not only a genuine interest in making content but also lets brands and companies see that I see my work from a business perspective. I also work alongside many celebrities, as I used to be a celebrity manager, many of these appearing across my socials starring in videos, following, watching stories and reacting within comments, which is always great for engagement.
